RELEASE: Immediate

Jacobsen Launches First Lithium Powered Super Light Five Reel Mower

Jacobsen has perfected its claim as leader of lithium mowers in the golf market with the release of the new SLF1 ELiTE.

Sixty million hours of ELiTE Lithium use on fine turf facilities has helped create an industry defining five reel mower that makes no compromises on performance.

Users get up to seven hours of operation per charge with Jake's leading 500 plus amp-hour Li-ion battery, which is powered by Samsung SDI lithium technology. This run time ensures no lithium mower can cover more of a golf course on a single charge.

The machine offers convenient on-board overnight charging that fits with existing universal electrical infrastructure, making it as simple as plugging it in at the end of the day ready for the next.

Practical convenience is at the forefront of the SLF1 ELiTE with virtually maintenance-free next-gen components, and the introduction of an advanced on-board and remote-ready monitoring system. With this in place, machine diagnostics can be analyzed to give you the solutions you need to keep cutting.

The control center, located on an adjustable swing out console arm, features lockable speed and Jacobsen's trusted frequency of clip controls to guarantee a consistent and exceptional finish every time on fairways, large trim and surround areas or terrain with undulations.

With the SLF1 ELiTE, Jake's signature quality of cut comes with new operator benefits. Lithium power provides silent cutting with minimal vibration which reduces operator fatigue and increases productivity.

Silence means cutting when you want to. Whether it's early in the morning or late at night, you can mow the course whenever you need to regardless of your surroundings.

Ultimate productivity is cutting where you want. The SLF1 ELiTE was tested in wet conditions and challenging slopes to ensure the power goes where you need it. The specialized agile cutting units allow the SLF1 to cut in undulations where other machines can't.

The hydraulic-free design rounds off a proven and powerful machine that is leading the way for lithium mowers in range and cut quality.

About Textron Inc.

Textron Inc. is a multi-industry company that leverages its global network of aircraft, defense, industrial and finance businesses to provide customers with innovative

solutions and services. Textron is known around the world for its powerful brands such as Bell, Cessna, Beechcraft, Hawker, Jacobsen, Kautex, Lycoming, E-Z-GO, Greenlee, Textron Off Road, Arctic Cat, Textron Systems, and TRU Simulation + Training. For more information, visit: www.textron.com.
